

PROPOSAL

# Borndates: live site, member profiles, private messaging.

Fixed price. Four weeks.

---

PREPARED FOR

**Mustafa**

DATE

**29 July 2026**

PREPARED BY

**Pure Code Digital**

VALID UNTIL

**28 August 2026**

---

01 — WHAT YOU GET

**\$3,200, fixed, in four weeks.**

Borndates live on your domain. People sign up, set up a profile, find other members, and message each other privately. The design is already settled, so this buys a finished, working site rather than a prototype.

- ✓ Live Borndates site on your domain, built from the approved design
- ✓ Sign-up and sign-in
- ✓ Member profiles — photo, name, handle, short bio
- ✓ Private one-to-one messaging between members
- ✓ Works properly on phones as well as laptops

---

02 — PRICE

# Half up front, half when it's live.

USD. Fixed price — no hourly billing, no overage.

| TRIGGER                              | AMOUNT         |
|--------------------------------------|----------------|
| On signature — work begins           | \$1,600        |
| On acceptance — live and handed over | \$1,600        |
| <b>Total</b>                         | <b>\$3,200</b> |

Hosting runs **\$30 per month**, billed to you directly — it is not part of the \$3,200. Four weeks from kickoff, with a private link to watch it come together from week one. Timings assume feedback within three business days when we ask for it.

## 03 — TERMS

### The short version.

- You own the site, the code and the designs outright on final payment. No lock-in.
- Two rounds of revision included. Anything beyond what is described in this document is quoted before work starts.
- The second payment is due on your acceptance — if it doesn't match this document, it gets fixed first.
- Confidential both ways. Happy to sign your NDA instead.

## 04 — ACCEPT

### Tick the box and we'll send the authorization.

To accept, email **[dj@purecodedigital.com](mailto:dj@purecodedigital.com)** and the authorization to sign will follow the same day.

Once it's live and you've seen how people use it, we can scope what comes next — quoted separately.
